COMMERCIAL CUSTOMER CERTIFICATION STATEMENT
FOR USE OF AEDC FACILITIES

As a Department of Defense Major Range and Test Facility Base (MRTFB) installation, AEDC is prohibited from competing with industry in its testing and test support activities. However, AEDC may provide services to private industry when those services are not reasonably available within the private sector. Reasons for determining that a private sector source does not meet the commercial customer's needs include, but are not limited to: Insufficient technical capability, lack of appropriate security, or inability of facility or capability to meet schedule needs. Lower cost of an MRTFB facility or capability, standing alone, is not an acceptable basis for a commercial customer to request use of MRTFB facilities in lieu of those available in the private sector. The following certification is required to assure that AEDC meets the requirements for non-competition with industry. Please complete the following company information and applicable certification with supporting information and return to: **AEDC/PKP, Suite A332, Arnold AFB TN 37389-1332**.
